Overview

I am a versatile creative professional with expertise across frontend development, digital marketing, social media strategy, content writing, and graphic design, combined with a passion for music. My diverse skill set allows me to build responsive and engaging websites, craft impactful digital campaigns, design visually appealing graphics, and create compelling content that connects with audiences. As a musician, I bring creativity and storytelling into everything I do, blending technical skills with artistic vision to deliver innovative solutions and meaningful experiences.

Work Experience

Full-stack Project (church website)
(2025) Really Great Website

- Designed and developed a responsive church website to improve online presence and accessibility for members.
- Built the frontend using REACT for a clean and user-friendly interface.
- Implemented the backend with Node.js, MongoDB to handle content updates, events, and member information.
- Integrated features such as sermon uploads, events calendar, online giving, and contact forms to engage the community.
- Optimized the website for speed, SEO, and mobile devices, ensuring smooth performance across platforms.

Media Marketer (Chinwe Media)
